The trademarks, including corporate logos and emblems ("Trademark(s)"), are subject to copyright, as well as Trademark rights of either Akrapović d.d., Malo Hudo 8a, 1295 Ivančna Gorica, Slovenia ("Akrapović") or third persons, authorizing Akrapović to use them. Any reproduction, technical or other manipulation, translation, or other use of the Contents and Trademarks is prohibited without an explicit prior written consent of Akrapović.

Products, product information and their representations are provided for informative purposes only. Discrepancies between the appearance in the Catalogue and the actual products or product information may exist. Akrapović reserves the right to use additional elements for displaying its products, serving better representation only. Such elements do not represent Akrapović products and are not subject to advertising, offer or sale nor does the present Catalogue represent an offer made by Akrapović. For actual information on specific products, their availability and specifications in each country, please contact Akrapović or local Akrapović authorized dealer. Not all products are necessarily available at every Akrapović dealer. Availability of Akrapović products is subject to Akrapović's discrepancy, mainly based on inventory availability and manufacturing lead time. Akrapović may at any time and at its own discretion change the design, equipment and delivery specifications, without any prior notice. All Akrapović products must be used in accordance with the respective user's guide, with consideration of all safety instructions and precautions only.

Akrapović does not assume any responsibility for printing errors or misrepresentations in the present Catalogue and may change any of the information contained herein at any time. Additional information on Akrapović products may be found at www.akrapovic.com. Please check our website as we continually launch new products.

WARNING: Because of the world-wide distribution of Akrapović d.d. products, neither Akrapović d.d. nor any of its subsidiaries make any representation that the products comply with the air and/or noise emissions laws, or labeling laws, of any jurisdiction. The purchasers are entirely responsible for informing themselves of the applicable laws where the products are to be used and to comply with those law.

WARNING/USA: Various U.S. states and the U.S. federal government have individual laws regulating the use of aftermarket exhaust parts and systems, especially as those parts and systems modify, remove, or replace original equipment catalysts. Please consult the appropriate laws in your area before installing any aftermarket part or system on your vehicle to ensure compliance with all applicable laws. Neither Akrapović d.d. nor any of their subsidiaries or the sellers of the parts or systems make any representation that any of their parts or systems comply with any such laws.

WARNING/California: California laws prohibit the use of any aftermarket exhaust part or system that modifies, removes or replaces original equipment catalysts unless the California Air Resources Board has issued an Executive Order regarding such part or system or unless the part or system is exempted by being used only on racing vehicles on closed courses. Neither Akrapović d.d. nor any of their subsidiaries make any representation that any of their parts or systems has received such an Executive Order or that any of their parts or systems conform with the racing vehicles exemption. The purchasers are entirely responsible for informing themselves of applicable California laws and to comply with those laws.

ECE Type Approval

Akrapović exhaust systems that meet ECE type approval are designated in this catalog with the  icon.

CARB Compliant (Replacement parts)

Akrapović exhaust systems that are CARB compliant (replacement parts) are designated in this catalog with  icon.

ENTERING A NEW DIMENSION WITH AKRAPOVIČ

High-performance exhaust systems for Mercedes-AMG

ABOUT AKRAPOVIČ

STAND OUT WITH AKRAPOVIČ

Increased performance
Advanced technology
Quality workmanship
Unique Sound
Innovative Design
Improved Durability

Akrapović exhaust systems are renowned for increasing performance, their unmistakable sound, state-of-the-art designs, significant weight reductions, quality workmanship, and durability. This ethos has been in Akrapović's DNA since the beginning, and the brand has grown to international prominence, standing proudly at the top of the performance

exhaust manufacturer's tree. Through the use of innovative technologies, including the development of titanium alloys, which has led to unmatched high-quality components produced and cast in in-house foundry, Akrapović has pushed performance levels to outstanding heights and created a unique soundtrack for its exhaust systems.

In addition to this, it has broken barriers in the design world. The impressive honours and numerous awards it has won for its ground-breaking exhausts, including the Red Dot product design awards, are a true recognition of everything Akrapović has accomplished.

25 YEARS AND COUNTING

Akrapovič is marking an important milestone in the company's history in 2016, when the Slovenian exhaust specialist celebrates its 25th anniversary. Since its inception in 1991, when founder Igor Akrapovič began tuning engines and making exhausts in his garage for local motorcycle racers, Akrapovič has

grown to international recognition as the foremost manufacturer of premium exhaust products in the world. Racing has always been the lifeblood of Akrapovič, and, as the company celebrates its 25th anniversary, it also celebrated its 100th world champion, a feat achieved when Jorge Lorenzo (Movistar Yamaha MotoGP) won the MotoGP™ championship in 2015.

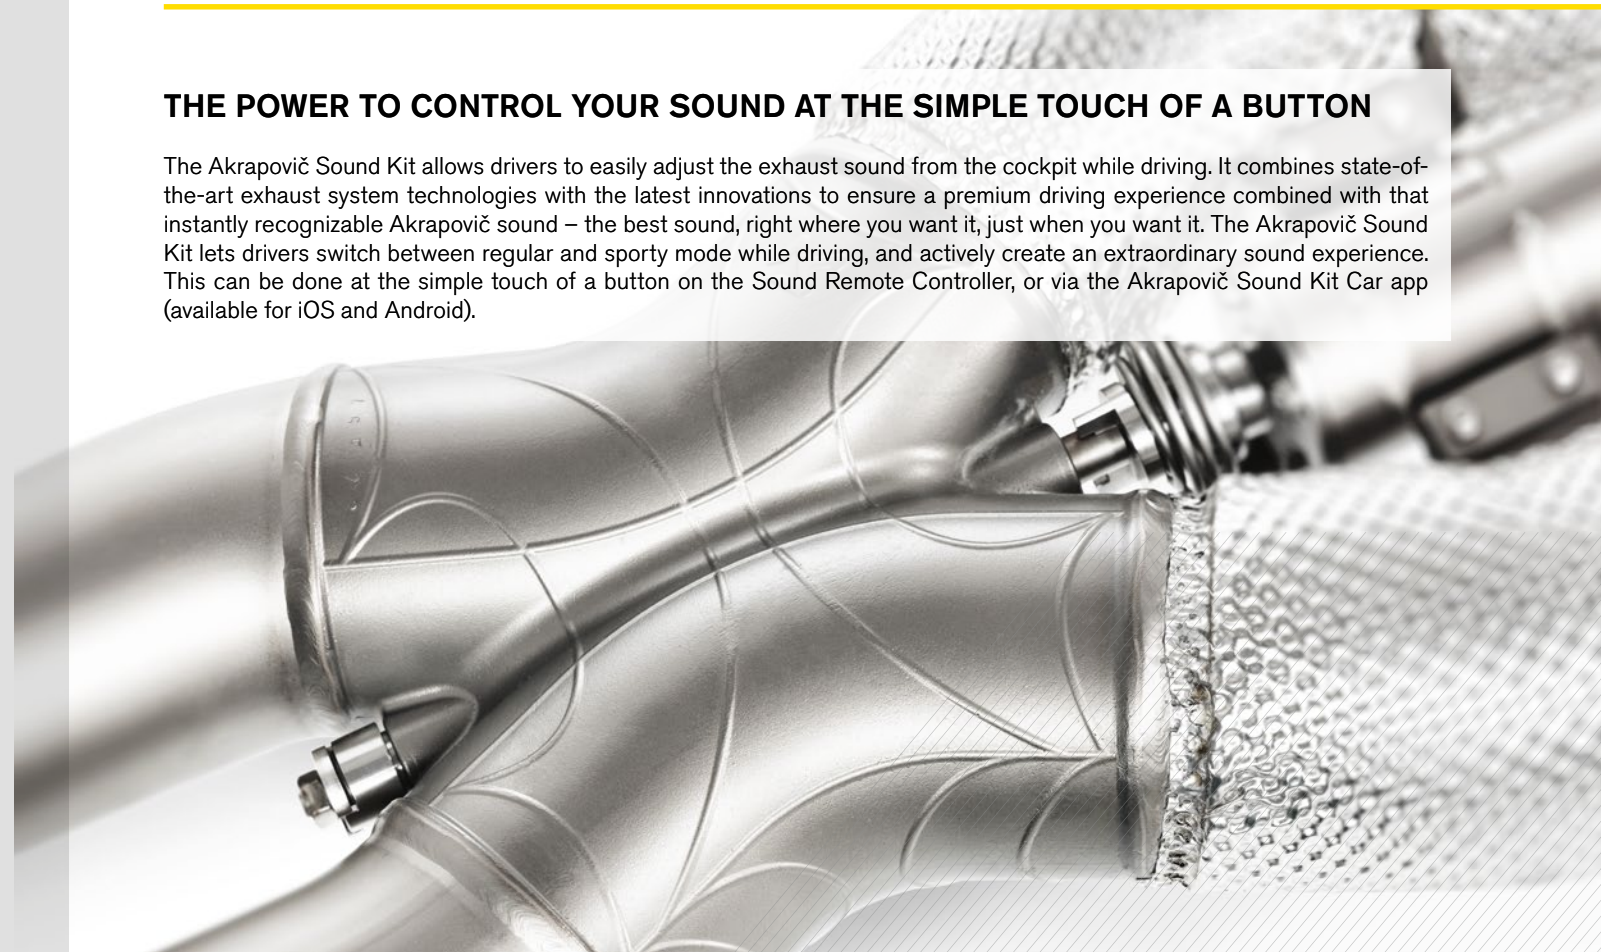

TECHNOLOGY

THE X-CONNECTION IS THE KEY INNOVATION

The revolutionary aspect of the Akrapovič exhausts for the Mercedes-AMG S 63 Coupé/Cabriolet and Mercedes-AMG C 63 Sedan/Estate/Coupé is the presence of a dual sound character, achieved by introducing the active X-connection, where exhaust flows from both sides of the engine meet and mix. The X-connection is Akrapovič's key innovation, a carefully designed piece, cast from durable titanium, which includes a guided and precisely machined valve flap remotely controlled by the driver by simply pushing the Sound Remote Controller. With the valve flap open (i.e., with both gas flows mixing), the sound is fuller, more continuous and resonant, and slightly higher in frequency. When the valve flap is closed and there are two exhaust flows from both sides, you can feel the pure, strong sound of the exhaust gas shockwaves.

THE POWER TO CONTROL YOUR SOUND AT THE SIMPLE TOUCH OF A BUTTON

The Akrapovič Sound Kit allows drivers to easily adjust the exhaust sound from the cockpit while driving. It combines state-of-the-art exhaust system technologies with the latest innovations to ensure a premium driving experience combined with that instantly recognizable Akrapovič sound – the best sound, right where you want it, just when you want it. The Akrapovič Sound Kit lets drivers switch between regular and sporty mode while driving, and actively create an extraordinary sound experience. This can be done at the simple touch of a button on the Sound Remote Controller, or via the Akrapovič Sound Kit Car app (available for iOS and Android).

AKRAPOVIČ EXHAUST SYSTEMS FOR THE MERCEDES-AMG MODELS

S 63 AMG COUPÉ/CABRIOLET

Evolution Line (Titanium) MTP-ME/T/1H ECE CARB RP

+11.7 HP/2250 rpm // -14.7 kg (-47.0 %)

Evolution Link Pipe Set (Titanium) E-ME/T/2

The Evolution Line is made entirely from the highest-quality titanium, which has been perfectly formed by the expert knowledge of Akrapovič technicians, and features parts cast at the company's in-house foundry. Absolute precision was required to create a revolutionary aspect of the exhaust, which is an active X-connection in the link pipes that allows exhaust gases to mix from both sides of the engine to create improved flow for better performance. The system has been created with durability in mind as well as performance. The use of special titanium alloys enabled the Akrapovič engineers to create an exhaust that is ultralight: 47% lighter than the stock system.

The sound engineers refined the exhaust's intensity to ensure that the S 63 AMG Coupé/Cabriolet – with its cylinder firing sequence and unique sound – produces a rich, full, and pleasing tone from the eight-cylinder engine, alongside a second character that delivers a more pulsating and forcible roar. By simply pushing the button on the Sound Remote Controller, the driver can completely alter the sound of the S Coupé/Cabriolet because

the kit controls the active X-connection – used in an Akrapovič system for the first time ever – which features a guided and precisely machined valve flap that allows the exhaust flows from both sides of the engine to meet and mix.

The innovative Evolution Line system also marks the first time that a special technique of seamless integration between the titanium and carbon-fibre composites has been used to create a continuous finish for the system's tailpipes. These set off the rear of the car perfectly and add a signature touch that displays the technical knowhow and expertise of Akrapovič to the full.

AKRAPOVIČ EXHAUST SYSTEMS FOR THE MERCEDES-AMG MODELS

C 63 AMG SEDAN/ESTATE/COUPÉ

Evolution Line (Titanium) MTP-ME/T/2H/1 (Sedan/Estate) ECE CARB RP

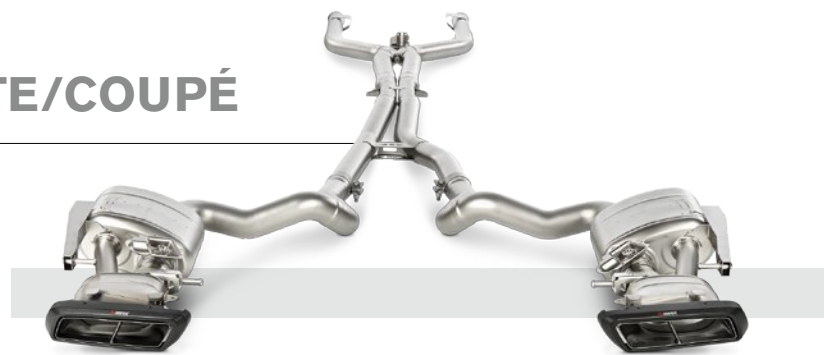

Evolution Line (Titanium) MTP-ME/T/3H (Coupe) ECE CARB RP

+8.00 hp / 2,000 rpm // -13.0 kg (-45.1%)

Evolution Link Pipe Set (Titanium) E-ME/T/3

Akrapovič Sound Kit P-HF949

Valve Actuator Kit P-HF985

Perfectly formed using specially developed ultra-lightweight titanium alloys and finished with hand-crafted matte carbon-fibre tailpipes, this beautifully designed system is designed to replace either the base stock exhaust or the performance stock exhaust system for the Mercedes-AMG C 63 and C 63 S Sedan, Estate and Coupé.

The Evolution Line exhaust system consists of two mufflers, both incorporating titanium valves, which are cast in Akrapovič's in-house foundry. Another feature of this exhaust system is a unique active X-connection. Also created in the in-house foundry, the ultra-light active X-connection contains a valve flap in the middle designed to serve up optimal sound and performance results in every one of the car's modes. The active X-connection offers two defined sound characteristics and three different driving sound settings. In Comfort and Sport modes, the X-connection is open, producing a more continuous and refined sound with higher frequencies. The rear valves are closed at low revs in Comfort mode for a quieter and more comfortable ride, and in Sport mode the rear valves are usually open, delivering a sporty but still refined sound with

enhanced higher frequencies. In Sport+ and Race modes, the middle valve is closed and the rear valves are open. This system is perfectly tuned by Akrapovič's sound engineers to maximize the sound output and give the cars a sporty and intense muscle car V8 roar, without losing any of the signature AMG sound and appeal. The optional Akrapovič Sound Kit controller lets users choose the exhaust mode regardless of the mode selected for the vehicle. This has a major impact on the sound and is a recommended upgrade when replacing the base exhaust system.
